

Meeting with Udo Sonne before Milestone Meeting #2

19.12.2017

Key Points / Results

Sources that need to be indexed first

- MOOC providers
 - edX
 - Harvard
 - Coursera
- ebook-sources
 - getAbstract
 - skillsoft or bookboon

We have to be there before 10, preferably at 9.45h and everyone has to bring their ID.
The meeting tomorrow will start at 10:30am and will go until 1:00pm the latest

Concerning the order of presentation Udo wants us to start with the presentation of our website and talk about functionality afterwards.

The homepage (page#1) of our portal doesn't look presentable (at least on my and Lucas' devices)
Someone has to look over the code and fix that
We're gonna present the portal before we get to the "naming and logo" section of the presentation.
That's why we should not include LELA on the website for tomorrow

Page #3 is not ready to be presented with functionality tomorrow, but we could/should have a static prototype example for how page 3 looks for a specific course to give them an idea.

Udo would like us to point out tomorrow how complicated the backend configuration is and that it's not trivial at all. The slides for that are already created.

The name LELA should be in all capital letters.

For the final presentation on Jan 24th:

Udo would like to have a few dummy users, so we can showcase how search suggestions and saved searches work and differ from user to user.
